The harness comes complete with one Finsterwalder titanal carabiner.
 There are four loops for towing: two for aero towing and two for winch towing.
 The accessory pocket, radio pocket and dragchute container are located on the opposite side of the rescue parachute container.
 The dragchute container is on the left side behind the rescue parachute container.
 Please take all measurements with light clothes on (T-shirt, jeans and trainer shoes) and write them into the boxes.
IMPORTANT: the difference between the total height and the shoulder height should be from 26 to 32 cm. If not, the measurements are probably wrong and you must take them again!
 Please take your measurements making sure that:

- the chest measurement is taken 5 cm below the armpit at the nipple level
- the hip measurement is taken around your bottom
